WHITE ON CORAL (APP ICON)

## Size Test (Favicon / App Icon)

### CORAL WITH WHITE CUTOUT

The cutout holds up well even at small sizes!

## Why Negative Space Works Better

- **Works on any background** — no color clash issues
- **Cleaner** — one color, not two
- **More sophisticated** — negative space is a classic design technique
- **Scales better** — the cutout is visible even at 16px
- **App icon ready** — white M with cutout on coral background looks sharp
